Base Operations Management and Time Tracker
(fka JobOps/Sage 100c Manufacturing)

Class Dates: Monday, January 18 thru Friday, January 22
12:00pm – 4:30pm Eastern Daily
(5 – ½ day sessions)

Class Price: $795 per student

Class Prerequisites:
- **Partners** – None. You qualify to take the certification exam after this class.
- **End-Users** – Must know and have experience with Sage 100.

Class Description:
Sage Operations Management Base and Time Tracker modules. You will learn about the unique integration between Sage Operations Management and other Sage 100 modules. Through hands-on activities, you will learn the module setups, create and modify work tickets, as well as explore procurement tools for purchased and manufactured materials. You will also learn how to assign and issue components, record labor, and invoice work tickets.

Class Details:
- The class is conducted via GoToWebinar. Once your registration is paid, you will receive a link for your personal access to the class.

- A Training Manual is provided in PDF format for your use with the course.

- A Sage 100 image is provided that includes the software needed to complete the activities and to interact with the software on your own workstation.
