# Getting The Job Done Right

## One Business Solution

When your business data is housed in disparate systems, efficiency plummets and the data you need to make strategic business decisions comes too late—compromising your ability to compete effectively.

JobOps is a comprehensive job management solution that works in conjunction with Sage 100 systems, providing an integrated ERP solution that delivers both operational and financial information from a single reliable source.

## Manage Complex Jobs

JobOps Job Management Software is an integrated job management tool for companies that build products, provide installation or perform services. By providing the critical tools needed to manage complex jobs, JobOps allows you to meet customer demands, and have financial visibility and controls so you can be more competitive.

## Become More Efficient

Rising labor and material costs eat away at your company's profitability. To make money you don't simply have to sell more, you must work smarter and more efficiently—without wasted time, effort, or expense.

JobOps improves the communication flow between departments by reducing redundancies, minimizing paperwork and delivering management tools that are critical to your success.

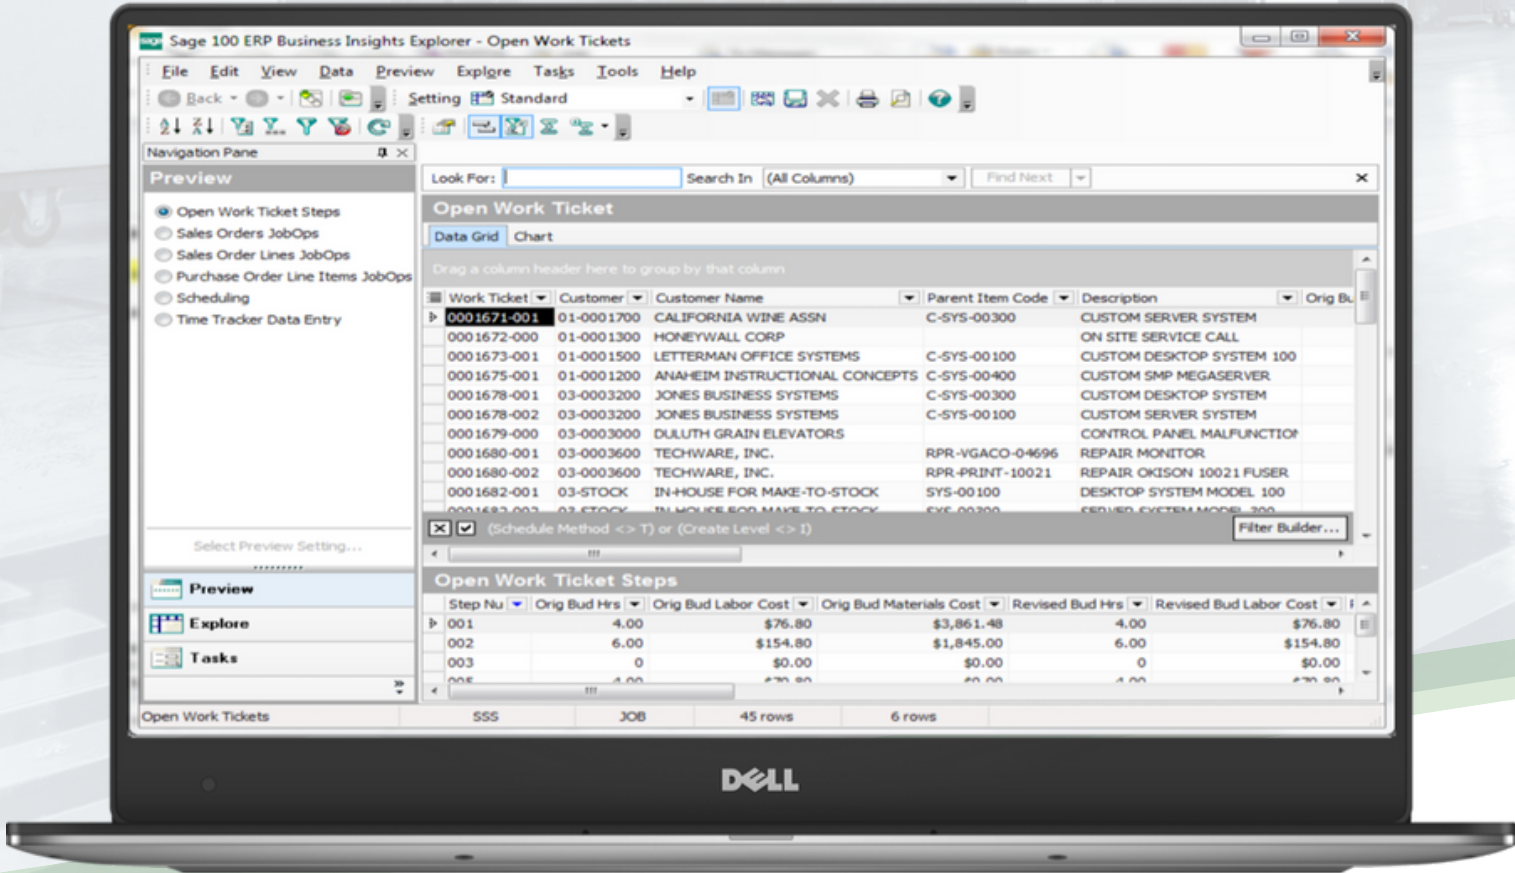

## Adapt To Change

In your business, there are always changes and exceptions. JobOps allows your organization to adapt to real-world changes. Companies that cannot quickly adapt their approach, processes, and procedures will lose to competitors that can.

It's not enough to simply deliver the product or service your customer's order; you've got to deliver it on time, on budget, and profitably. Exceed your customers' expectations—and you might even win the opportunity to do it again.

## Real-Time Business Insight

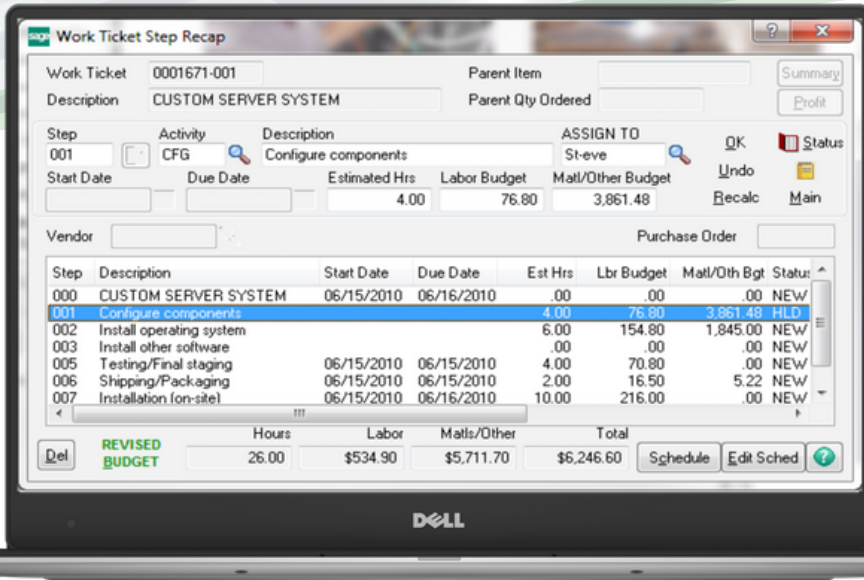

Business Insights Explorer provides a single, user-friendly interface that gives you quick access to business-critical information and related data – all the way down to the individual transaction.

- Get timely access to key business information in a format that is easy to use and understand
- Easily apply query, reporting, and statistical analysis to make faster and better decisions for your future
- Share information with others in your organization in a meaningful way

# JobOps

JobOps provides tools to manage the complete job life-cycle—allowing you to operate more efficiently and competitively.

## Estimating

JobOps simplifies estimating to allow you to quickly and easily create accurate quotes.

- Re-use past quotes to speed the creation of new ones
- Combining bills of material, routings, labor, and contracted services to create a detailed cost roll-up
- Automatic update of material costs to reflect recent purchases
- JobOps Product Configurator aids in selecting options and calculating pricing

## Sales Orders & Work Tickets

JobOps integration with Sales Order lets you streamline work-flow so that all job information is available from a single source.

- Quickly convert from an approved, detailed quote to a sales order
- Generate work tickets automatically
- Check material availability before release
- Attach product documentation and procedures specific to the job
- Product Configurator automatically creates configured item's pricing

# JobOps

"The software minimizes the number of manual steps performed, allowing our staff to be more productive."

Step Description	Budget	Current	Projected	Projected Var	% Variance	Per Unit
Revenue	8,645.00	.00	8,645.00	.00	.00	8,645.0000

Total Cost	6,246.60	1,212.86	6,476.80	(230.20)	(3.69)	6,476.8000
Profit \$	2,398.40	(1,212.86)	2,168.20	230.20	9.60	2,168.2000
Profit %	27.74	.00	25.08			
Hours	26.00	24.50	35.90	(9.90)	(38.08)	35.9000

## Job Planning

JobOps allows you to proactively monitor the status of your jobs, delivering the tools to review, refine and improve estimating and job planning.

- Verification of quote accuracy before production starts
- Determine material availability
- Notify purchasing of shortages
- Check production schedules
- Easily track original versus revised estimates

## Purchasing

JobOps Component Exception Manager helps analyze your supply and demand for jobs—so you can purchase the right products and materials at the right time.

- Creates dynamic to-do list
- Consolidates purchasing requirements
- Purchase recommendations based on reorder points and minimum order quantities
- Automatically generates purchase orders
- Optimizes cash flow by reducing excess inventory levels
