Scanco Mobility Suite for Sage 100/100cloud

What is Mobility?

It's your connection to all things mobile with Sage 100/Sage 100cloud 2018. Fully manage your supply chain from order placement through manufacturing and distribution with the latest in technology from the leader in supply chain management for Sage 100. Sage Mobility now gives all Sage 100/Sage 100cloud users access to real-time information on any iOS or Android device with a portfolio of apps from Scanco designed specifically for the Sage 100 supply chain.

Scanco Mobility Suite for Sage 100/100cloud

SCANCO SALES

Closing more sales without a long sales cycle is the goal of all sales organizations. Scanco Sales can help increase revenue per salesperson, up-sell, cross-sell and repeat sales confidently. Having real-time product availability on your mobile device and the ability to access customer account information any-time anywhere provides a superior buying experience.

- View and edit customer information on your mobile device
- Review your catalog with customers, and show related items
- Create a quote and email it to your customer
- Check product availability and confidently commit to fulfilling orders

SCANCO WMS 100

Every company has unique needs when it comes to the level of automation they are interested in implementing. Scanco has structured our solutions with that flexibility in mind. With features like Advanced Shipping, Live Validation, and Batch Select; Scanco Warehouse 100 has the functionality of a complete warehouse management solution that will not only scale with your business but, drive growth. Native iOS & Android Application (Windows Compatible) Item Inquiry Advanced Item Inquiry Receiving-ROG Inventory Issues Inventory Receipts Alias Item Creation Inventory Transfers Instant Bin-to-Bin Moves Standard Multi-Bin Physical Count by Item Physical Count by Item-by Bin Shipping-Invoice Data Entry Shipping-Shipping Data Entry Order Picking-Directed Pick Dashboard Voice Prompts Batch Select

INTERPORT SCANCO MOBILITY FOR BARCODE

Automate your cycle counting and year-end physical count from any iOS or Android device. The application seamlessly integrates into Sage 100/100cloud eliminating the need for paper counting and data entry. With countless hardware accessory options, users can scan barcodes, look up items, and send counts real time into Sage 100/100cloud. Increase counting speed by 75% and eliminate human error with Scanco Mobility. Native iOS & Android Application **Physical Inventory Counts** Cycle Counting **View Inventory Pictures Quick Count Review** Operates on Wi-Fi or Cellular Online and Offline Mode Freeze Items on the fly

SCANCO MANUFACTURING EFFICIENCY

Manufacturing Automation doesn't have to be complicated. There's no need for expensive software that operates outside of your accounting system. At Scanco, we build the power into your Sage 100 ERP system—bringing you powerful enhancements integrating with our mobile scanning solutions. Our solution makes Make-to-Order manufacturing simple and efficient. It's seamless, cost-efficient, and easy-to-upgrade.

Provides make-to-order, assemble-to-order, and engineer-to-order manufacturers a more efficient and effective manufacturing process through Sage 100/100cloud ERP's Work Order Module. With increased automation and pre-set options, Manufacturing Efficiency will help minimize user entry and maximize workflow.

FIELD SERVICE & DISPATCH

When your service needs to stand above the rest, you need the integrated JobOps Field Service & Dispatch and industry-leading Sage 100 solution. This comprehensive solution delivers more than limited import and export tools or standalone products by giving you complete end-to-end functionality from service requests to billing.

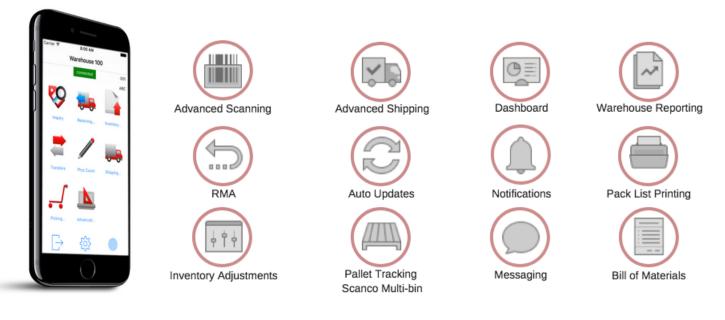

SCANCO ENTERPRISE WAREHOUSE 100

Enterprise 100 is true automation at its finest. With seamless integration into Sage 100 and developed natively to run on iOS and Android environments, Enterprise 100 from Scanco is the most advanced and trusted technology on the market today for Sage 100 users.

Master and take control of your distribution process using the simplicity of Enterprise 100 with the familiarity of iOS and Andriod hardware. Built for speed and efficiency, Enterprise 100 gives you control of your operation out of the box.

Pre-built hardware profiles are included in the application and require mere minutes to configure. Designed around the user experience with a visually appealing interface, it takes minutes to train your users. All of this means you will be up and running without long implementation times.

SCANCO MULTI-BIN

Scanco Multi-bin and Warehouse Management include the experience of 17 years integrated exclusively for Sage 100 ERP. It provides a seamless multi-bin and warehouse management system WMS functionality integrated for Sage 100 ERP. It is flexible to setup to get quick startup and simple design, and it can be setup or more advanced needs utilizing WMS features. The built-in Directed Picking and Directed Putaway features provide comprehensive options, so the system directs as you want to. It is compatible with most extended solutions, developer enhancements, and business object integration.

- Multi-Bin Inventory
- Directed Picking
- S/O Auto Pre-Allocations
- Directed Put Away
- Hold, Customer Reserve & Pick Restrictions
- Wave Pick Sheets
- Invoice, Transfer, and Manufacturing Auto Allocations
- Business Object Interface (Boi),
- Custom Office Udfs
- V/I One Warehouse Hardware Integration
- Real-Time and Batch Location Replenishments

SCANCO MANUFACTURING AUTOMATION

Scanco's manufacturing barcode solutions offer an efficient and accurate way to collect information on your shop floor and easily allows you to manipulate that data into dynamic tools to guide your business and reach your full manufacturing potential. By tracking core areas of labor, material, completions, and QC quickly and effortlessly, you can compile oceans of vital information to drive your business and streamline your efficiencies.

JOSCAN

No other function within your organization is as labor intensive as tracking the parts and labor associated with your jobs. Every point in the process where you rely on employees to write down or enter information manually is an opportunity for error. Re-entering data from time cards or job tickets is costly and wasteful. JOScan eliminates manual data entry tasks delivering immediate access to accurate up-to-date information. Easy and intuitive to use so your payback begins immediately, not after a lengthy training and implementation period. JOScan delivers just what you need, when and where you need it.

WOSCAN

No other function within your organization is as labor intensive as tracking the parts and labor associated with your jobs. Every point in the process where you rely on employees to write down or enter information manually is an opportunity for error. Re-entering data from time cards or job tickets is costly and wasteful. JOScan eliminates manual data entry tasks delivering immediate access to accurate up-to-date information. Easy and intuitive to use so your payback begins immediately, not after a lengthy training and implementation period. JOScan delivers just what you need, when and where you need it.

JobOps Suite

JOB MANAGEMENT SOFTWARE

JobOps integrated solutions allow operational and financial information to work together and be accessible from a single source. JobOps delivers strong functionality to operations and finance — providing full-featured job management and tracking which can enhance a company's workflow.

Core functions of JobOps include estimating, orders, job planning, purchasing, scheduling, job costing and tracking and service capabilities. Optional modules include Data Collection, Configurator, Enhanced Scheduling and Field Service & Dispatch.

- Re-use past quotes to speed the creation of new ones
- Combining bills of material, routings, labor, and contracted services to create a detailed cost roll-up
- Automatic update of material costs to reflect recent purchases
- JobOps Product Configurator aids in selecting options and calculating pricing

SALES ORDERS & WORK TICKETS

JobOps integration with Sales Order lets you streamline work-flow so that all job information is available from a single source.

- Quickly convert from an approved, detailed quote to a sales order
- Generate work tickets automatically
- Check material availability before release
- Attach product documentation and procedures specific to the job
- Product Configurator automatically creates configured item's pricing

JOB PLANNING

JobOps allows you to proactively monitor the status of your jobs, delivering the tools to review, refine and improve estimating and job planning.

Verification of quote accuracy before production starts

Determine material availability

Notify purchasing of shortages

Check production schedules

Easily track original versus revised estimates

PURCHASING

JobOps Component Exception Manager helps analyze your supply and demand for jobs —so you can purchase the right products and materials at the right time.

- Creates dynamic to-do list
- Consolidates purchasing requirements
- · Purchase recommendations based on reorder points and minimum order quantities
- Automatically generates purchase orders
- Optimizes cash flow by reducing excess inventory levels

COSTING & TRACKING

JobOps gives you real-time management tools to manage your jobs effectively.

enhanced

scheduling

t

time

tracker

Real-time job status

Real-time actual costs to date

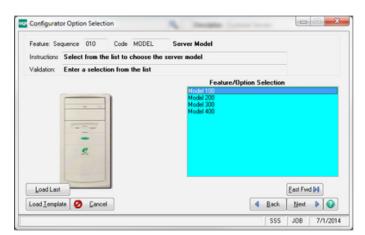

Profit analysis for remaining cost projections

Real-time alerts let you know of potential cost overruns while in production

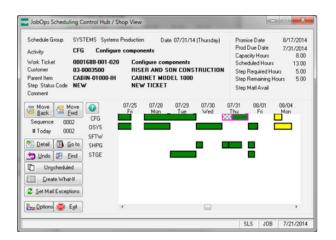

Field Service & Dispatch is a solution for companies that require only field service as well as companies that make or install what they service.

The Product Configurator asks simple questions needed to configure your customer's product. The result is a fast, accurate estimate or sales order, a comprehensive bill of material, and the ultimate formula for success.

JobOps graphical scheduling tools helps you prioritize your job schedule so you can meet promise dates.
