Release Notes for Sage Production Management 2021.1 Version 7.00.1.0.0

The following is a list of corrections and selected enhancements added to Sage Production Management 2021.1 Version 7.00.1.0.0.

Product updates are cumulative; in other words, this update includes all enhancements, corrections and programs found in Sage Production Management 2021 Versions 7.00.0.0.0 and 7.00.1.0.0.

Before installing Sage Production Management 2021.1 Version 7.00.1.0.0, install Sage 2021.1 version 7.00.1.0. Refer to the Sage Production Management Installation Guide.

After installing Sage Production Management 2021.1 Version 7.00.1.0.0

1. Sage Production Management may not be uninstalled.
2. Work orders in the Work Order module may not be created or processed. Only Work Order Inquires and Reports may be accessed in the legacy Work Order module.
3. The Materials Requirements Planning module may not be accessed.

 **Warning:** Hot fixes may be available for Sage Production Management 2021.1 Version 7.00.1.0.0. Refer to the Sage Production Management Installation Guide.

 **Warning:** Install Sage Production Management 2021.1 Version 7.00.1.0.0 into a parallel test Sage 100 environment. Performing a test upgrade or a test Changes fromstall allows you to resolve issues that may occur during the live upgrade or live Changes fromstall, reducing downtime and allows you to get a rough estimate of how long the upgrade process will take. Refer to the [Sage Knowledgebase article ID 101266](#) for more information. As not noted in the Sage Knowledgebase article before step 20, third party products must be re-installed after a migration.

 **Warning:** Sage Production Management 2021.1 Version 7.00.1.0.0 may not be compatible with non-Scanco third party products. If you use third-party products that integrate with your Sage product, check with the vendor of your third-party product to ensure their product is fully compatible with this release. If you integrate with other Sage products, check with your business partner or Sage to ensure that these components are compatible.

Accounts Payable

Changes from 2021

- 1 Manual Check and Payment Register: An error 14 AP_140ManualCheckRegister_upd.pvc Line 430 no longer occurs when a manual check for General Ledger distribution is updated.
Sage Knowledgebase ID 109784
ID 19120
- 2 Manual Check and Payment Register: An Error 13 AP_140ManualCheckRegister_upd.pvc Line 1005 no longer occurs when a manual check for invoice distribution without a work ticket is updated.
Sage Knowledgebase ID 109784

Sage Knowledgebase ID 106212
ID 17553
- 43 Work Ticket Transaction Entry: The unit cost value assigned to a material with a negative quantity required now displays correctly in a materials issue transaction.
Sage Knowledgebase ID 107396
ID 18527
- 44 Work Ticket Transaction Entry: The unit cost value assigned to a material with a negative quantity required now displays correctly in a materials issue transaction when Scanco Multi-Bin and Sage Production Management are activated and set up.
Sage Knowledgebase ID 107396
ID 19167
- 45 Work Ticket Transaction Entry: The correct quantity completed and quantity to complete values are not posted to JT_TransactionEntryDetail when a quantity of .01 is typed in the Quantity field in a completion transaction for a work ticket assigned a serial item as the parent item.
Sage Knowledgebase ID 110247
ID 19244
- 46 Work Ticket Transaction Entry: The unit cost value for serial and lot item is now rounding correctly after assigning a distribution record.
ID 19357
- 47 Work Ticket Transaction Journal/Update: The unit cost value assigned to a material with a negative issued quantity now displays correctly on the Work Ticket Transaction Journal.
Sage Knowledgebase ID 107396
ID 18528
- 48 Work Ticket Transaction Journal/Update: The parent item unit cost is now correct when more than one completion for a work ticket exists on the same transaction.
Sage Knowledgebase ID 108448
ID 18864
- 49 Work Ticket Transaction Register/Update: Unit cost values are now correct when a completion and a scrap transaction for the same work ticket exist in a completion transaction.
Sage Knowledgebase ID 108452
ID 18865
- 50 Work Ticket Transaction Journal/Update: An error 47 JT_WTTransactionRegister_ui.pvc Line 161 no longer occurs when, after updating the journal, the Missing Cost Report is printed and the DSD Six Decimal Precision enhancement is installed.
Sage Knowledgebase ID 110075
ID 19159
- 51 Work Ticket Transaction Journal/Update: The unit cost value assigned to a material with a negative issued quantity now displays correctly on the Work Ticket Transaction Journal when Scanco Multi-Bin and Sage Production Management are activated and set up.
Sage Knowledgebase ID 107396
ID 19166

- 52 Work Ticket Transaction Journal/Update: A zero quantity closing transaction or completion with the Close W/T check box selected is now correctly assigned a zero cost value when Scanco Multi-Bin and Sage Production Management are activated and set up and WIP/Cost was fully relieved/recognized on a completion that was updated prior to the closing work ticket.
Sage Knowledgebase ID 108921
ID 19173
- 53 Work Ticket Transaction Journal/Update: The parent item unit cost is now correct when more than one completion for a work ticket exists on the same transaction and Scanco Multi-Bin and Sage Production Management are activated and set up.
Sage Knowledgebase ID 108448
ID 19174
- 54 Work Ticket Transaction Register/Update: Unit cost values are now correct when Scanco Multi-Bin and Sage Production Management are activated and set up and a completion and a scrap transaction for the same work ticket exist in a completion transaction.
Sage Knowledgebase ID 108452
ID 19194
- 55 Work Ticket Transaction Journal/Update: The unit cost is now calculated correctly for completed parent items when multiple completion transactions for the same work ticket in multiple batches are updated.
ID 19218
- 56 Work Ticket Transaction Journal/Update: The unit cost is now calculated correctly for completed parent items when Scanco Multi-Bin and Sage Production Management are activated and set up and multiple completion transactions for the same work ticket in multiple batches are updated.
ID 19232
- 57 Work Ticket Transaction Journal/Update: Correct values now display for a materials transaction when Production Management and Multi-Bin are installed and active and a quantity is not issued for a backflushed line.
ID 19237
- 58 Work Ticket Transaction Journal/Update: Previewing the journal and not updating a completion transaction is no longer creating an over distribution record in IM_ItemCost for FIFO/LIFO parent items.
ID 19355
- 59 Work Ticket Transaction Journal/Update: Previewing the journal and not updating a completion transaction is no longer creating an over distribution record in IM_ItemCost for FIFO/LIFO parent items when Scanco Multi-Bin and Sage Production Management are activated and set up.
ID 19358
- 60 Work Ticket Transaction Entry: The Unit Cost field is now disabled for standard items in materials transactions.
ID 19362
- 61 Work Ticket Transaction Entry: The Unit Cost field is now disabled for items assigned a standard validation method in materials transactions when Scanco Multi-Bin and Sage Production Management are activated and set up.
ID 19366
- 62 Work Ticket Transaction Journal/Update: The unit cost is now correct for the scrap transaction, the correct cost value posts to the GL scarp account, and the correct value is updated to JT_TransactionHistory.UnitCost when a completion transaction and a scrap transaction are updated in the same batch for the same work ticket.
ID 19399
- 63 Work Ticket Transaction Journal/Update: Quantity, cost and lot/serial numbers now display correctly on the Journal when Scanco Multi-Bin and Sage Production Management are activated and set up and Scanco Multi-Bin is disabled for the warehouse or product line.
