# Scanco Payments Automation

## *AR Automation for Sage 100 – Merchant Account Services*

Make it easier for your customers to pay invoices and simplify accounts receivables.

Scanco Payments Automation now offers Merchant Account Services for Sage 100. By enabling customers and sales representatives to take charge of the payment process with digital payments, invoices can be paid effortlessly.

### Get Paid Faster

- Sales Reps Take Payments in the Field
- Customer Payment Portal for Self-Service
- Less AR Intervention

## Speed Up Accounts Receivables

Scanco Payments Automation simplifies the AR process and frees up time for the accounting department. When customers and sales representatives can take charge of the payment process, invoices can be paid effortlessly without the intervention of AR.

Using Scanco Mobile Sales, sales representatives can take EMV credit card payments from their mobile devices, and you get paid faster.
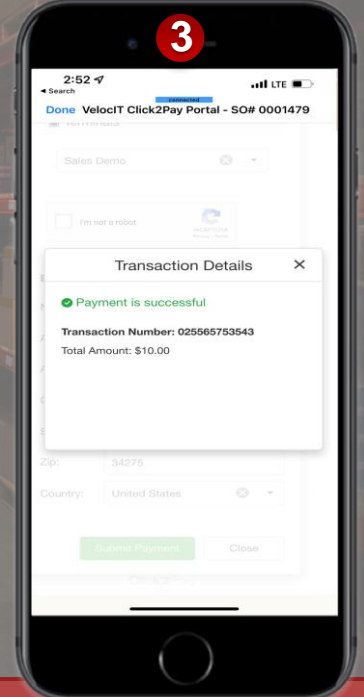

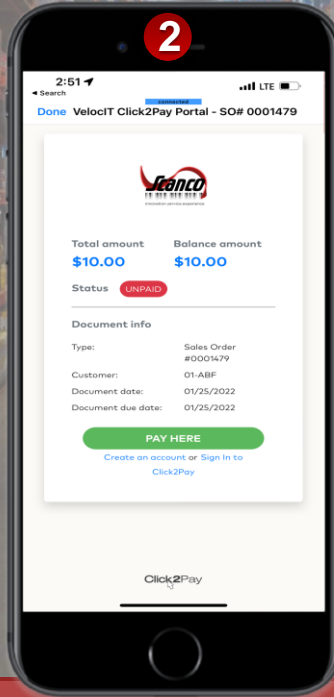

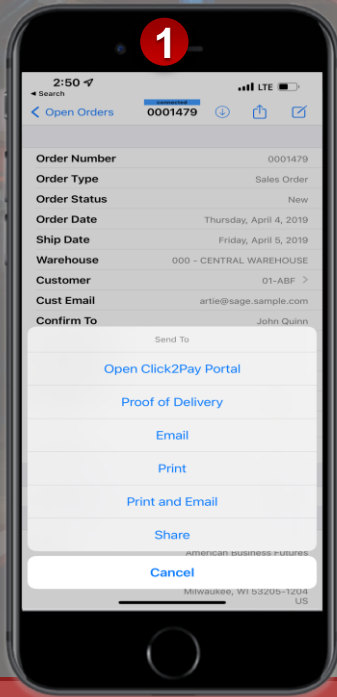

## Increase Payment Security

Scanco Payments offers EMV card payments for secure, mobile payments. EMV is the "chip card" technology that provides more secure payments, thereby reducing merchant liability. The payment is so secure that EMV credit card data cannot be read by cybercriminals even if they breach the system.
