# Production Management Plus

## *Increase Efficiency and Automate Production Processes*

**Production Management Plus is tightly integrated with Sage 100 to increase visibility into the manufacturing process and costs. Ideal for medium sized, make-to-order manufacturers or distributors with less than 10,000 orders per day.**

### Manufacturing Visibility and Control

- Greater Process Visibility
- Increased Agility
- Accurate Real-Time Costs
- Optimize Inventory
- Customizable

## The "Plus" in Production Management Plus means greater automation and optimization!

Scanco Production Management Plus offers manufacturers the tools you need to achieve visibility and control of your entire production process.
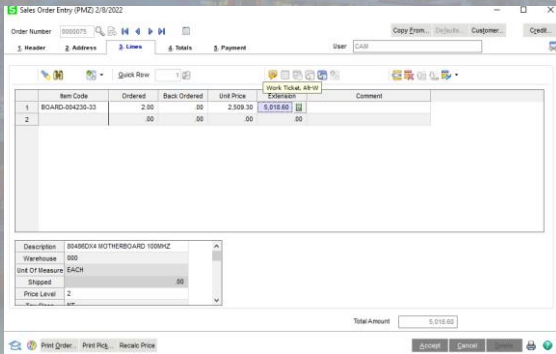

Because the module is tightly integrated with Sage 100, organizations always know their costs, the status of items, and the material quantities required to meet demand.

The result is greater accuracy, higher visibility, and more optimized inventory.

Sales Order Entry

Sales Order Options

## Track Complex Costs for Increased Reporting Accuracy

Track costs beyond a simple bill of materials. Support for labor tracking and other job-related attributes—such as overheads, direct AP costs, and status—means you get a complete picture of costs. With accurate, real-time reporting, you can track costs relative to budget and make quick adjustments to inventory, materials, and processes.

## Real-Time Visibility for Up-To-Date Progress Reports

Real-time item statuses let you know where you are in the supply process and enable you to keep your customers up-to-date with the progress of their orders—helping you to improve customer satisfaction by maintaining accurate expectations.

## Inventory Management Optimization to Eliminate Error Risk

Integrated inventory management controls enable you to minimize the risk of errors from exporting sales order data, spreadsheet data, and manually creating purchase orders to ensure that materials are at levels necessary to meet demand.

---

**1** Tie Work Tickets to Sales Orders

✓ Create work tickets for procurement types that are not make to order

✓ Match the order type to the Work Ticket status

**2** Auto-Release Functions Included

**3** Explode Sub-Assemblies

✓ Working from a Bill of Materials, you can choose to explode sub-assemblies

**4** Reduced fraud and secure payments through EMV card transactions that are 100% PCI compliant
