Scanco Mobile Inventory for Sage 300

Streamline stock count, shipment, and movement.

Scanco Mobile Inventory is a transactional inventory control solution that is seamlessly integrated with Sage 300. Increase efficiency and lower costs in the warehouse.

Key Benefits

- **Increase Warehouse Productivity**
- **Gather and Read Real-Time Inventory Data**
- **Eliminate Data Entry Errors**

Increase Warehouse Efficiency

Scanco Mobile Inventory for Sage 300 is an enterprise warehouse mobility application that streamlines stock count, shipment, and movement within a warehouse.

Using a mobile device, item quantities, transfers, location, and inventory counts can be captured or viewed.

Barcode scanning increases efficiency and eliminates data entry errors.

Wirelessly import customer details, sales orders, shipped quantity, shipment details, received items, vendor details, and POs directly into Sage 300.
