Chris,

MP2 update applied 10/30/2017 at 4:30 PM ET. You may recall that the MP2 Settings are based on each Windows User.

				Setu	p				
IP2 Set	up:								
Required Keyt	ooard Prompts	UDF's	Other						
Default Printe	c.						Connectit Ad	dress:	
						~		localhost	
Label Path:							Port:

						Browse			
fo								Cancel	Accept

Everyone will get a blank screen first time they fire up MP2 tomorrow:

Screenshots are below on how to set it up properly:

Setup AP2 Setup:

- Reminder that the users will need to pick the RIGHT label [PER TAB] just once. After that, MP2 will remember the user's last used/selected label.
- I think we had a support problem last time I was onsite because the user's were so used to the right label being selected automatically, they were thrown for a loop when it was changed on them.

That's it! Email me if any issues. Let me know about the Expiration Date. Now that MP2 is updated, we can dive into any setting/label designs to get you what you need.
